UNIVERGE® SV8100 Communications Server

Fulfilling the promise of UNIVERGE®360

Businesses today demand efficient, seamless communications that facilitate rapid decision-making and customer responsiveness. By utilizing people and their roles as a basis for developing the right communications solutions for small to medium-sized businesses, NEC's UNIVERGE360 approach allows businesses to tailor their communications to fit their specific requirements and helps them succeed at this accelerated level.

The UNIVERGE SV8100 Communications Server, part of UNIVERGE360's Unified Infrastructure, is the ideal system for businesses that wish to compete and grow over time. This robust, feature-rich solution is completely scalable and can be expanded to meet your communications needs both now and in the future.

At a Glance

- Scalable to assist growing businesses
- VoIP and traditional voice support
- Enhanced centralized management
- Investment protection
- Seamless networking
- Twinning support for the mobile user
- Diverse features and applications

Scalable to Assist Growing Businesses

The SV8100 functions alone or in a network and can expand to meet your business communications needs, including mission-critical data applications.

VoIP and Traditional Voice Support

You can deploy a pure IP solution or any combination of IP and traditional circuit-switched technology on a single SV8100. This support provides the ability to customize the best communications solution for your business.

Enhanced Centralized Management

The SV8100 offers centralized management of your communications systems. Moves, adds and changes of SV8100 phones are quick and easy. Simply plug any phone into any jack wherever it's needed and it's ready to go.

Investment Protection

The SV8100 protects your technology investments while providing a migration path to pure IP. Its flexibility supports your existing NEC traditional circuit-switched technology and can be fully utilized to run in a pure IP environment.

Empowered by Innovation **NEC**

Seamless Networking

Designed to be both versatile and scalable for your growing business needs, the SV8100 supports IP, TDM, video, wired or wireless. Its resources and features can be transparently shared between branches or remote locations by networking up to sixteen SV8100 sites or by linking SV8100s with other NEC communications servers including:

- UNIVERGE SV8300 Communications Server
- UNIVERGE SV8500 Communications Server
- UNIVERGE SV7000 Communications Server
- NEAX® platforms

Twinning Support for the Mobile User

The SV8100 supports telephone twinning, which enables users to link to their desktop phones with an external number such as a cell phone. With twinning, users need only manage and publish one contact number. When a user's desk phone rings, the twinned phone rings simultaneously.

The twinned device also provides access to the SV8100's features, which gives mobile employees all of the functionality of their desktop phones – regardless of where they are.

Diverse Features and Applications

The SV8100 streamlines communications for the entire organization with its diverse suite of features and applications. It enables individuals, departments and locations to work more efficiently by ensuring seamless internal and external communications.

A wide range of on-board applications and high-powered features can be transparently shared between branches or remote locations.

- NEC's **UNIVERGE IP and Digital Terminals** (both Desktop and wireless DECT) enhance user mobility and increase your employees' productivity – whether they are at their desks or have stepped away.

- Compatibility with **UC for Business** allows you to take advantage of the productivity-enhancing benefits that unified communications has to offer.

- Embedded applications can easily be accessed and utilized through simple license activation:
  - UNIVERGE SV8000 Series Automatic Call Distribution (ACD)
  - UNIVERGE SV8000 Series InMail
  - UNIVERGE SV8000 Series Hospitality Management Solution

- Windows®–based **UNIVERGE SV8000 Series PC Pro/WebPro** provides centralized browser-based programming access.

- **Mobile Extension** provides access to all the features of your desktop phone from nearly any external communications device. Its one-number access allows employees to be reached wherever they are.

Additional solutions supported by the UNIVERGE SV8100 Communications Server include:

- UNIVERGE SV8000 Series Desktop Suite
- UNIVERGE SV8000 Series InRouter
- UNIVERGE SV8000 Series Communications Analyst
- UNIVERGE SV8000 Series Multimedia Conference Bridge
- UNIVERGE SV8000 Series Voice Security Recorder (VSR)
- UNIVERGE UM8000-Mail Solution
- UNIVERGE SV8000 Netlink
- UNIVERGE MH240 Mobile Handset
- UNIVERGE SV8100 Interactive Voice Response
- NEC's SonicView IP Recording
- UC for Business
- UNIVERGE SV8000 Series E911 Security Notification
- NEC's Perfect Communicator

Whether you are a small or medium-sized business, NEC's UNIVERGE SV8100 Communications Server provides the scalability and flexibility to meet all of your communications needs.

UNIVERGE360 is NEC's approach to unifying business communications. It places people at the center of communications and delivers on an organization's needs by uniting infrastructure, communications and business.
